

Table(7): Correlation between platelets count and Quality of life in COPD patients (QOL) by CAT score:

	Platelets Count	
	r	p-value
CAT score	-0.041	0.781

Table (8): Correlation between MPV and severity of COPD in exacerbated group as regard Spirometric pulmonary function

PFT	MPV	
	r	p-value
FVC	0.164	0.658
FEV ₁	0.435	0.001**
FEV ₁ / FVC	0.355	0.003*
FEF 25-75	0.332	0.004*

Table (9): Validity of MPV cutoff value in predicting COPD exacerbation group

	Sensitivity	Specificity	+VE predictive	-VE predictive	Accuracy
MPV cutoff	76.0%	80.0%	79.1%	76.9%	78.0%
